

# Contemplating The Super Scientific On My Journey Toward Enlightenment

In a world driven by technology and scientific discoveries, it is easy to overlook the profound mysteries that lie beyond the grasp of human knowledge. Our quest for understanding often focuses solely on empirical evidence, leaving little room for contemplation of the intangible and ethereal aspects of existence. However, on my personal journey toward enlightenment, I have come to realize the immense value of blending scientific exploration with philosophical inquiry, as these two domains complement each other in unique and unexpected ways.

Being an avid observer of the world around me, I have always sought to find connections between seemingly unrelated phenomena. It is through this exploration that I stumbled upon the concept of synchronicity – a term coined by renowned psychologist Carl Jung. Synchronicity refers to meaningful coincidences that cannot be explained by causality alone. These occurrences transcend the boundaries of scientific explanation and hint at a deeper interconnectedness of all things.

One such instance of synchronicity occurred on a starry night when I found myself gazing at the heavens, marveling at the vastness of the cosmos. As I contemplated the mysteries of the universe, a shooting star streaked across the sky, leaving me in awe of the perfect timing of this celestial event. In that profound moment, the scientific understanding of the universe merged seamlessly with my philosophical musings about the nature of existence. It was a glimpse into the interconnected web of reality, where the scientific and the spiritual converge.

## On The Shoulders of Giants: Contemplating the Super Scientific on My Journey Toward Enlightenment

Another fascinating phenomenon that has piqued my interest is the concept of quantum entanglement, which challenges our conventional understanding of space and time. Quantum entanglement suggests that particles can become linked in such a way that the state of one particle affects the state of another, regardless of the distance between them. This non-local connection defies the speed of light limitation imposed by Einstein's theory of relativity and hints at a deeper underlying order in the fabric of the universe.

As I immersed myself in the exploration of quantum physics, I couldn't help but notice the striking similarity between the entanglement of particles and the interconnectedness of all living beings. Just as quantum entanglement suggests an invisible bond between particles, our collective consciousness may be intertwined in ways yet to be fully understood. This realization opened up a new realm of contemplation for me, where scientific principles and spiritual concepts intertwine, offering a more holistic perspective on reality.

While some may argue that science and spirituality are inherently incompatible, I find that they offer different lenses through which we can comprehend the mysteries of existence. Science provides us with a framework to understand the tangible aspects of reality, while spirituality brings forth the intangible aspects that reside beyond the confines of our physical senses. Combining the two can lead to a more profound understanding of our place in the universe.

On my journey toward enlightenment, I have also found solace in the principles of mindfulness and meditation. These practices allow me to quiet the incessant chatter of the mind and tap into a deeper sense of inner peace and connectedness. By cultivating present-moment awareness, I am able to observe the wonders of the world with fresh eyes, unburdened by preconceived notions or the limitations of scientific explanations.

, embarking on a journey toward enlightenment involves embracing both the scientific and the spiritual dimensions of our existence. By exploring the wonders of the universe through the lens of scientific inquiry and merging it with philosophical contemplation, we can transcend the limitations of empirical evidence and connect with the deeper mysteries of life. It is through this integration that a more profound sense of interconnectedness and enlightenment can be achieved, allowing us to navigate the complexities of existence with a renewed sense of wonder and awe.

Have you ever wondered who you are and why you're here, have you ever pondered the existence of alien beings from distant worlds or other dimension? Are we being visited by these beings? Have you ever wondered what it would take to make something invisible? Have you ever thought it may be possible to heal your self, others, or the planet, with nothing more than a touch, a prayer, or a thought? If you have answered yes to any of these questions, you are not alone, so please continue.

Within the chapters of this book I present some stories of my journey toward enlightenment. I will discuss my views on some of the topics I have been researching for over thirty years. I will discuss everything from Consciousness, Energy Healing, Extraterrestrials, Multiple Dimensions, Subtle Energies, the Power of Intent, Quantum Physics, Quantum Mechanics, Reality, Our Potential Future and much more. I hope the personal experiences I share and my views of reality, will help you to expand your understanding of what and who you really are, what you are capable of and how, together, we create our reality.

I started to write this book in 2003 and again in 2011. In January 2013 I saw, what appeared to be, a Grey Alien hovering over my wife, as we lied in bed. After that event I decided the time has come to finish this project. I am a long time ET experienter, and I have some stories of life changing experiences I would like to share with you; in hopes that they may help you better understand this multidimensional reality; in which, we currently reside.

Over the past fifteen years or longer I have had dozens, perhaps hundreds of

daytime U.F.O. sighting; many of them with multiple witnesses. In fact, my multiple experiences with ET's were interesting enough to grab the attention of a documentary film crew from the U.K. So, in April, 2013 I became a contributor to a U.F.O. Documentary; which is supposed to be part of a new television series on a major U.S. cable television network. Due to the legalities involved with the non-disclosure contract I signed; I can't name the production company or the major U.S. cable network the show will air on, at this point in time. Allow me to explain why I agreed to tell my story to millions of television viewers around the world. I have lived a life of persistent and perpetual weirdness, and countless miracles. Since my early child hood I have had lucid flying dreams, out of body experiences, pre cognitive dreams, spirit guide or angelic contact, contact with extraterrestrial or multi-dimensional beings, multiple U.F.O. sightings and have witnessed apparition type miracles related to the Mother Mary. 'In August, 1996 myself along with a couple of hundred other people witnessed a white concrete, life sized, statue of the Mother Mary, holding the baby Jesus; form dark pupils in the eyes and then the whole face smiled.' Finally there is the previously mentioned, Grey hovering over my bed. This lifetime of strange events has kept me on the search for answers since these things began to occur to me. So, one of the reasons I agreed to contribute to the television program was, to try to help all of us find answers to some of these bazaar events which have occurred in my life. I am hoping that some of the details I shared with the investigators involved with T.V. program, will help U.F.O. investigators worldwide uncover more answers about extraterrestrial and inter dimensional beings. Edd came to my home for the filming of the T.V. show and met with the producers, he gave each one of them a personal demonstration of his abilities. Now here is the really cool thing. After careful observation of Edd physically moving people with the power of his mind from ten feet away; I figured out how he does it. What is even cooler than that is that I am going to tell you how it is done. I believe there is a good chance you will be able to do it. This is just one example of the answers I have in store for you.
