1. Diverse Range of Topics

The 17th International Summer School offers a diverse range of topics, covering areas such as artificial intelligence, cybersecurity, sustainable development, and much more. No matter your field of interest, you will find a workshop or lecture that captivates your attention and enhances your knowledge.

2. Renowned Speakers

One of the highlights of this Summer School is the lineup of renowned speakers who will share their expertise and insights. From leading professors to industry leaders, you will have the opportunity to learn from the best minds in the world.

3. Interactive Workshops

Participate in interactive workshops designed to provide practical skills and hands-on experience. These workshops encourage collaboration, problem-solving, and critical thinking, allowing you to apply what you've learned directly.

4. Networking Opportunities

The Summer School is not only about learning; it's also about making connections. Engage with fellow participants from diverse backgrounds, forge new partnerships, and exchange ideas. You never know when a simple conversation might lead to exciting collaborations or career opportunities.

5. Cultural Experience in Leuven, Belgium

Leuven, a vibrant city known for its rich history and charming architecture, provides the perfect backdrop for this event. Between sessions, take the opportunity to explore the city, visit historical landmarks, and indulge in local cuisine. The Summer School offers a unique blend of education and cultural immersion.

How to Make the Most of the 17th International Summer School?

Attending the 17th International Summer School is undoubtedly an exciting opportunity, but to ensure a truly enriching experience, it's essential to come prepared. Here are some tips to help you make the most of this event:

1. Plan Your Schedule

Prioritize the workshops and lectures that align with your interests and goals. Review the program in advance and create a schedule to ensure you don't miss any sessions that appeal to you the most.

2. Engage Actively

Participate actively during sessions by asking questions, sharing your insights, and engaging in discussions. The more you contribute, the more you'll learn and benefit from the collective knowledge of the speakers and participants.

3. Network Strategically

Take advantage of networking breaks and social events to connect with like-minded individuals in your field. Be proactive in initiating conversations, exchanging contact information, and following up after the event to nurture these connections.

4. Explore Leuven

Don't forget to take breaks and explore the beautiful city of Leuven. Immerse yourself in its rich culture, visit its renowned historic sites, and try the local delicacies. Use this opportunity to unwind and recharge.

5. Embrace Diversity

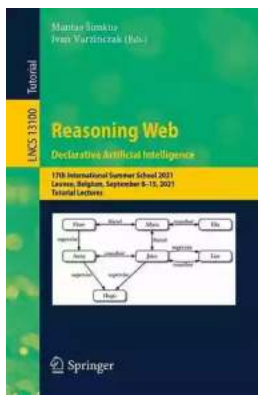

The International Summer School brings together participants from various backgrounds, cultures, and experiences. Embrace this diversity, be open-minded, and learn from different perspectives. Engage in meaningful conversations, respect differences, and foster an inclusive learning environment.

The purpose of the Reasoning Web Summer School is to disseminate recent advances on reasoning techniques and related issues that are of particular interest to Semantic Web and Linked Data applications. It is primarily intended for postgraduate students, postdocs, young researchers, and senior researchers wishing to deepen their knowledge. As in the previous years, lectures in the summer school were given by a distinguished group of expert lecturers.

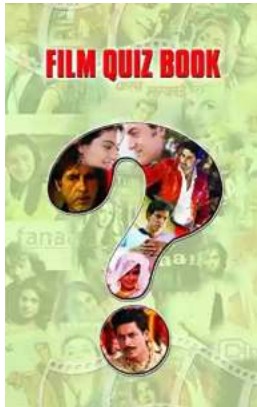

The broad theme of this year's summer school was again “Declarative Artificial Intelligence” and it covered various aspects of ontological reasoning and related issues that are of particular interest to Semantic Web and Linked Data applications. The following eight lectures were presented during the school: Foundations of Graph Path Query Languages; On Combining Ontologies and Rules; Modelling Symbolic Knowledge Using Neural Representations; Mining the Semantic Web with Machine Learning: Main Issues That Need to Be Known; Temporal ASP: From Logical Foundations to Practical Use with *teilingo*; A Review

of SHACL: From Data Validation to Schema Reasoning for RDF Graphs; and Score-Based Explanations in Data Management and Machine Learning.
