

Essays By And In Honor Of William Gehrlein And Dominique Lepelley Studies In

William Gehrlein and Dominique Lepelley are two distinguished scholars who have made significant contributions to their respective fields of study. In this collection of essays, we delve into the work and influence of these remarkable individuals.

William Gehrlein is a renowned expert in the field of economics, particularly in the area of mathematical modeling. His research has explored various economic phenomena, shedding light on complex economic systems. Dominique Lepelley, on the other hand, is a celebrated political scientist specializing in electoral systems and voting theory. Together, they have shaped the academic landscape with their exceptional insights and profound knowledge.

Contributions of William Gehrlein

William Gehrlein's body of work has encompassed a wide range of economic topics, with a particular focus on mathematical modeling. His research has examined the dynamics of financial markets, resource allocation, and game theory, among others. Through his studies, Gehrlein has provided valuable insights into the intricate workings of economic systems, helping experts develop effective strategies for decision-making and policy formulation.

One of Gehrlein's notable contributions is his exploration of market microstructure, which pertains to the study of price formation and trading mechanisms. By analyzing various market models and the behavior of traders, Gehrlein has developed an understanding of the factors that affect market efficiency and liquidity. His findings have influenced how economists perceive and analyze financial markets, enabling them to make informed predictions and guide investment decisions.

Achievements of Dominique Lepelley

Dominique Lepelley's expertise lies in the field of political science, particularly in electoral systems and voting theory. His research has delved into crucial topics such as voting manipulation, strategic voting, and fair division of resources. Lepelley's contributions have shed light on the intricacies of democratic processes, providing valuable insights for policymakers and electoral reformers.

Lepelley's work on electoral systems has been particularly influential. He has examined various voting methods, assessing their strengths and weaknesses in terms of fairness, representativeness, and efficiency. His research has contributed to the development of more robust electoral systems, helping

countries refine their democratic processes and ensure equitable representation for all citizens.

Essays by Other Scholars In Honor

In addition to the remarkable achievements of Gehrlein and Lepelley, this collection features essays by other scholars who have been inspired and influenced by their work. These essays explore diverse aspects related to economics, political science, and related fields, showcasing the far-reaching impact of Gehrlein and Lepelley's ideas on academia.

William Gehrlein and Dominique Lepelley are exemplary scholars whose contributions have significantly advanced their respective fields. Their work has not only expanded our understanding of economics and political science but has also paved the way for further research and discovery. This collection of essays serves as a testament to their influence, showcasing the enduring legacy they have created.

This book includes up-to-date contributions in the broadly defined area of probabilistic analysis of voting rules and decision mechanisms. Featuring papers from all fields of social choice and game theory, it presents probability arguments to allow readers to gain a better understanding of the properties of decision rules and of the functioning of modern democracies. In particular, it focuses on the legacy of William Gehrlein and Dominique Lepelley, two prominent scholars who have made important contributions to this field over the last fifty years. It covers a range of topics, including (but not limited to) computational and technical aspects of probability approaches, evaluation of the likelihood of voting paradoxes, power indices, empirical evaluations of voting rules, models of voters' behavior, and strategic voting. The book gathers articles written in honor of Gehrlein and Lepelley along with original works written by the two scholars themselves.
