The Origins of the Devil Brigade

joint Canadian and American force became renowned for their specialized training, unconventional tactics, and fearless fighting spirit. The Devil Brigade played a pivotal role in several key campaigns, leaving a lasting legacy in military history.

Recruitment and Training

The process of selecting soldiers for the Devil Brigade was rigorous and demanding. Only the most skilled and physically fit individuals were chosen to become part of this elite force. Candidates underwent a series of grueling tests, including long-distance runs, obstacle courses, combat simulations, and psychological evaluations. The selected soldiers then went through intense training that focused on a wide range of specialized skills such as parachuting, mountain climbing, skiing, hand-to-hand combat, demolition, and sabotage.

An Allied unit comprised of Canadian and American troops, the First Special Service Force or "Devil's Brigade" struck fear into the very heart of the Axis.

In the dark, early days of the Second World War, the Allies found themselves with their backs against the wall. With their armies, tactics, doctrine, and equipment in tatters, the Allies turned to special operations forces to carry the fight to the Axis enemy until their conventional forces could be built up once again. Specially selected and trained, these forces struck fear into the hearts of the enemy. One such unit, the First Special Service Force (FSSF) or Devil's Brigade, was created for a hazardous mission in Norway. This unique formation was composed of both Americans and Canadians who served side by side without distinction of nationality.

A killer elite, the FSSF consistently demonstrated courage and determination and earned itself an unrivaled combat record at Monte la Difensa and Anzio in Italy and in the invasion of southern France.
