

The Ultimate Year Subtraction Intermediate Numberfit Puzzle Game

Imagine a puzzle game that can challenge and entertain you for hours. Look no further, because Year Subtraction Intermediate Numberfit is here to provide you with endless fun and brain-teasing challenges. With its unique concept and addictive gameplay, this game is guaranteed to keep you hooked from the first moment you start playing.

What is Year Subtraction Intermediate Numberfit?

Year Subtraction Intermediate Numberfit is a puzzle game that combines the elements of math and logic to create a captivating gaming experience. The objective of the game is simple – you need to subtract a given number from the current year and arrange the resulting digits to form the target number.

For example, if the current year is 2022 and your target number is 5, you need to subtract 5 from 2022, which gives you 2017. Then, you arrange the digits 2, 0, 1, and 7 to form the target number 5. Sounds simple, right? Well, think again. As you progress through the game, the numbers become more complex and the time limit gets shorter, adding an extra level of challenge to each puzzle.

Numberfit's maths, movement and mindfulness subtraction workout for children aged 9-10 provides a holistic approach to education by including physical activity and mindfulness. Questions are in line with Maths Mastery and the National Curriculum for England. This worksheet is intermediate level, not right? Try the beginner or advanced worksheets.

Our worksheets and videos are designed to meet the aims of the National Curriculum for mathematics:

- become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language.
- can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Curriculum link for year 5:

Pupils should be taught to:

- add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)
- add and subtract numbers mentally with increasingly large numbers
- use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy
- solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
