It is also intended for professionals in the field today, to apprise them of contemporary issues for women in law enforcement and serve as a reference to guide policy and procedure development.

Authors Pamela Collins and Kathryn Scarborough not only define distinctions in law enforcement and private security but also provide an understanding of the importance of specificity, with regard to this occupational analysis. The authors' diverse background allows them to offer uniquely complementary approach, emphasizing both the importance of understanding the professions from a practical standpoint, while at the same time giving credence to academic analysis.
